

Oralcryst® Junior, The Leading Oral Care Candy For Kids That Fights Cavities With Natural Flavorings And S. Mutan Control Antigen.

(March 30, 2010 – San Rafael, CA) — Oralcryst Junior, (www.oralcryst.com), a revolutionary new oral care candy from Japan Premium Corporation, is a leading innovator in protecting children's teeth like no other. It uses a natural symbiosis approach to help kids chew away cavity-causing S. Mutan bacteria to help maintain tooth health. Oralcryst Junior has been classified as using Natural Flavorings per Food & Drug Administration regulations and definitions.

Oralcryst's flavorings contain natural oil extract derived from fruits and herbs to make its four fruit flavors: Orange, Strawberry, Green Apple and Grape. Besides being sugar-free, these products are also nut-free, soy-free, gluten-free, and trans fat-free, so they're a healthy alternative to traditional candies for kids.

Meet the founder, Nan Elvia, at these upcoming expos for the tips and tricks of oral care:

- Baby & Toddler Expo 2010, Philadelphia, April 10-11 (Booth #500)
- Dallas Kids Expo 2010, Dallas, May 1-2.

About Japan Premium Corporation
